

BROADBAND POWER SPLITTERS 800 - 2500MHz • DPS Series

Fiplex DPS Series of broadband power splitters / combiners are passive devices designed in a multistage Wilkinson configuration.

Due to the multistage Wilkinson configuration, this device features a low insertion loss and low VSWR ripple across the working frequency range.

Two, three and four output ports models available as standard, others available upon request.

Power input is 50W as splitter, and 1W as combiner, other values available upon request.
